

GPT Profit Vault — 3000+ Custom GPTs

+ Income Models & Reverse-Engineering Training

Hi

Thanks for picking this up, really appreciate it.

In the zip folder you will have this tutorial as well as an excel document with all the custom gpts in.

Let's get started

In the list of custom gpts there are the following categories:

- AI
- Art & Design
- Business
- Data
- Dating & Relationships
- Education & Learning
- Finance & Crypto
- Food & Beverage
- Games & Entertainment
- Health & Wellness
- Jobs & Career
- Language
- Law
- Music
- News & Media

- Others
- Philosophy
- Productivity & Utilities
- Real Estate & Housing
- Religion
- Science
- SEO & Marketing
- Shopping
- Social Media
- Sports
- Tech & Programming
- Travel, Dining & Tourism
- Video & Images

As you can see there are gpts for just about any category you can think of.

Ok, so now you have all these gpts, but how will they make me money you ask?

Monetization Methods

Let's use an example here:

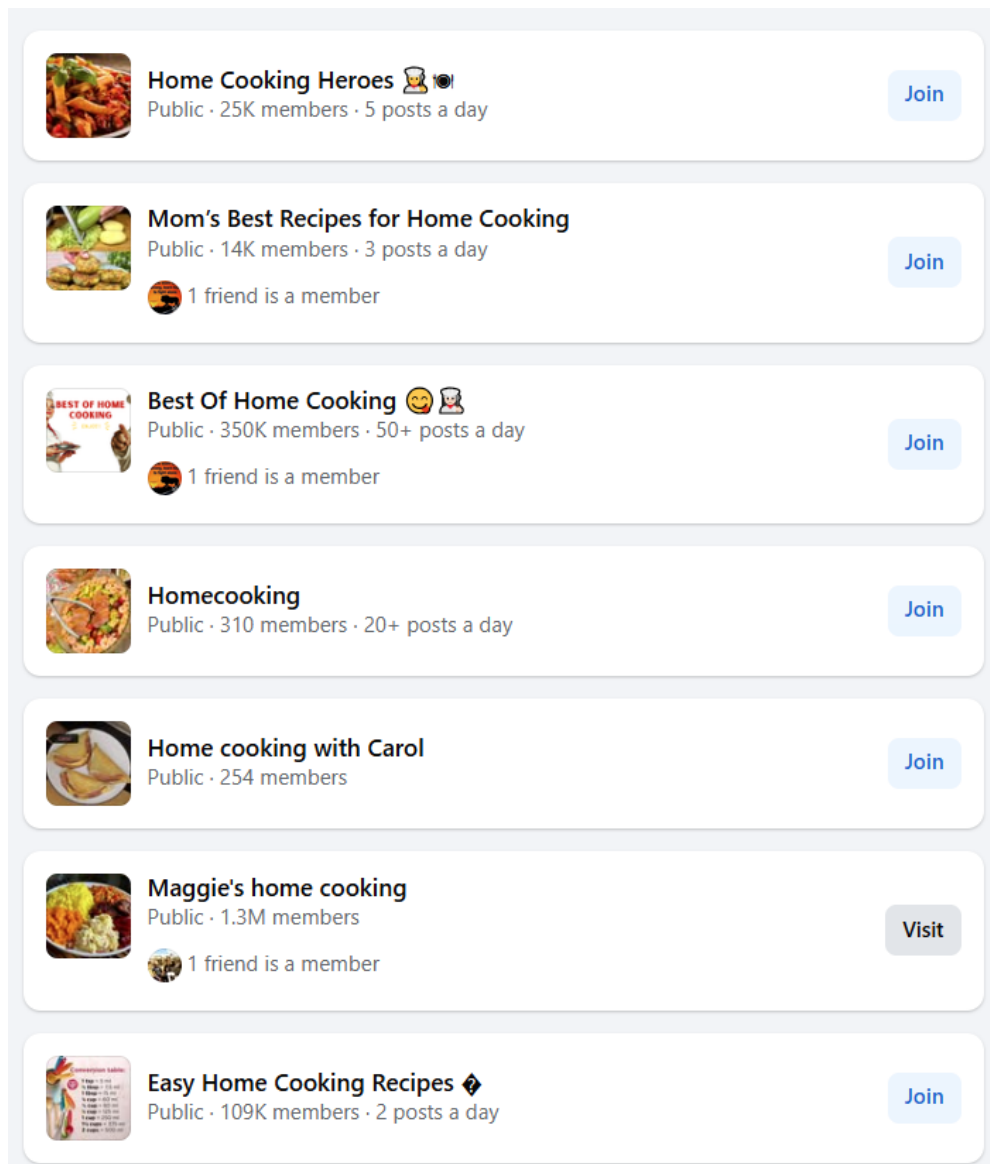

I just used a random custom gpt from the list, see below:

MrPizza	Hi my friend! Welcome to MrPizza, your personal assistant for making real Neapolitan pizza! Ai	Food & Beverage	https://chat.openai.com/g/g-8bXQg8ScG-mrpizza
Pocket Barista	I'm your virtual barista.	Food & Beverage	https://chat.openai.com/g/g-3HShFYkCM-pocket-barista
NutriGourmet Assistant	NutriGourmet Assistant – Your Tailored Nutrition and Culinary Advisor	Food & Beverage	https://chat.openai.com/g/g-8RUF16wrb-nutrigourmet-assistant
Chef GPT	Enter your ingredients, Chef GPT then curates a recipe for you based on them	Food & Beverage	https://chat.openai.com/g/g-6LbaUwFx-chef-gpt
Auguste Escoffier	Recipes from the best three-star chefs, covering all cooking styles, who offer the highest quality	Food & Beverage	https://chat.openai.com/g/g-86fyLtlMf-auguste-escoffier
Feast Finder	Quick restaurant suggestions with images of popular dishes.	Food & Beverage	https://chat.openai.com/g/g-3VaOL7e3e-feast-finder
BBQ Master	Informative Central Texas BBQ, served with a Texas accent	Food & Beverage	https://chat.openai.com/g/g-4twi4DEB2-bbq-master

This is a custom gpt that let's you enter the ingredients you have and it will create a recipe for you from the ingredients. So how can we make money from this custom gpt, well there are a few ways

First Method:

You are going to use Facebook, go to groups and type in “home cooking” this is what you will see

This is just a small example of the groups out there, as you can see some of these groups have over 100K members.

All you do is join a few groups, promote your custom gpt, use ChatGPT to come up with a really good message. Something like this:

<https://chat.openai.com/g/g-6LbaLuwFx-chef-gpt>

write a short sales pitch for a Facebook group called "easy home cooking recipes" " for my custom gpt called "chef Gpt". here is the url so you can see how it works: <https://chat.openai.com/g/g-6LbaLuwFx-chef-gpt>

Here's a short and catchy **sales pitch** you can post in your **Facebook group** ("Easy Home Cooking Recipes") to promote your **custom GPT — Chef GPT** 🍳

🔍 Meet Chef GPT – Your Personal Kitchen Assistant! 🍳

Tired of scrolling for recipes or guessing what to cook with what's in your fridge? Chef GPT's got you covered!

🌟 Just tell it what ingredients you have, and it'll whip up quick, easy, and delicious recipes — customized to your taste, skill level, and dietary needs.

💬 Try it here: <https://chat.openai.com/g/g-6LbaLuwFx-chef-gpt>

Replace this url with
your Gumroad url

Perfect for busy home cooks who want **simple, tasty meals** without the stress. 🍳

Go ahead — let Chef GPT be your new sous chef! 🍳

Would you like me to make a few **variations** (e.g., funny, friendly, or more professional) so you can test which one works best in your group?

Important – Obviously you need to set up Gumroad before you start promoting!!

Now you're not going to send them directly to the gpt, you are going to send them to [Gumroad](#). This is where you are going to set up your product so that it can be bought.

Here's a video showing you how to set up on Gumroad:

<https://www.youtube.com/watch?v=o9lKN0XL> Do

Use ChatGPT to come up with a heading, description etc.

write a heading and description for my gpt, tailor it for Gumroad and use keywords frequently used on Gumroad applicable to my product

Here's a **Gumroad-optimized heading and description** for your **Chef GPT** listing — written to attract buyers searching for easy recipe tools, AI cooking assistants, and kitchen productivity aids.

Chef GPT – Your AI Recipe Creator & Smart Cooking Assistant

Description (Gumroad-optimized)

Turn everyday ingredients into **delicious, easy home-cooked meals** with **Chef GPT**, your **AI-powered cooking assistant**. Whether you're a beginner, a busy parent, or a foodie looking for inspiration, Chef GPT helps you:

- ✓ **Generate custom recipes** in seconds based on what's in your fridge
- ✓ **Get step-by-step cooking instructions** tailored to your skill level
- ✓ **Filter by diet type, prep time, and ingredients**
- ✓ **Discover healthy, budget-friendly, and family-approved meals**
- ✓ **Never stress about "What's for dinner?" again!**

Perfect for anyone who loves **home cooking**, **meal prep**, or **easy dinner ideas**, Chef GPT saves time, reduces waste, and makes cooking fun again.

I suggest selling your custom gpt for \$7 - \$12. This seems to be the best pricing.

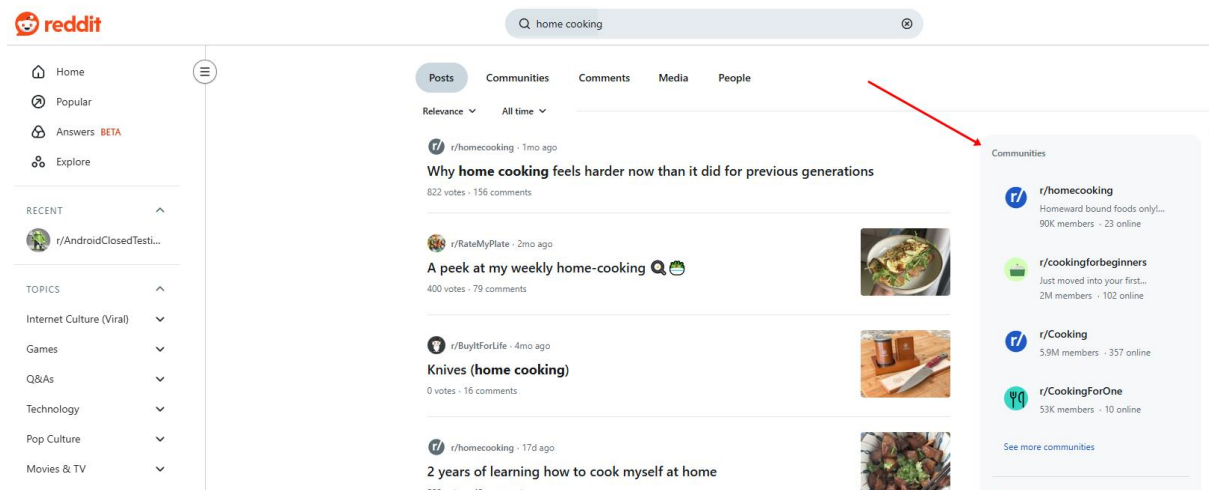

As you've seen above there are many categories of custom gpts, create a Gumroad listing for as many gpts in as many categories as you want and then promote them on applicable Facebook groups.

Can you see how powerful this is???

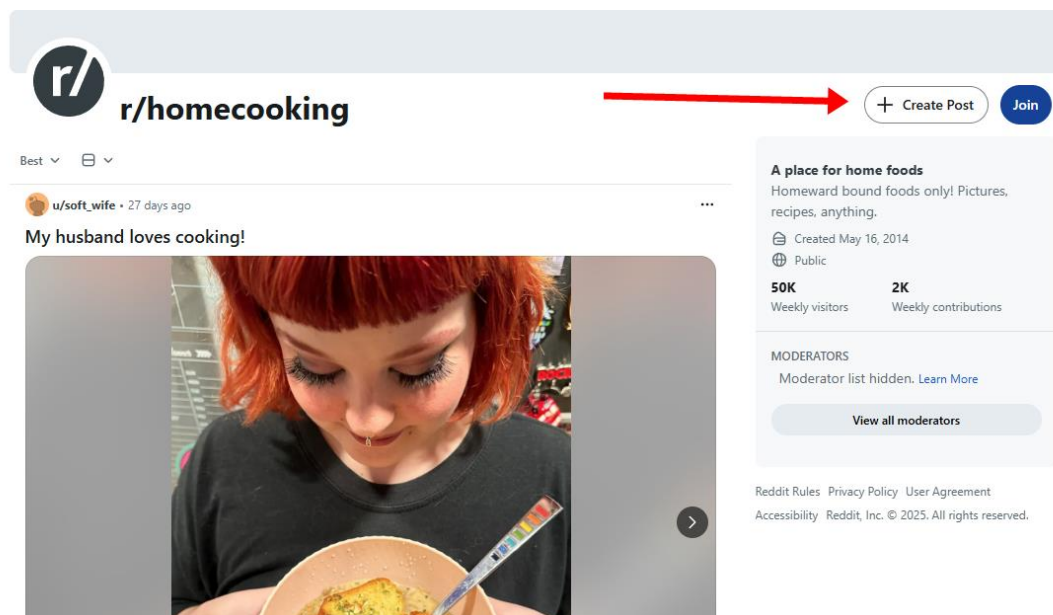

At this point you may be thinking but why will someone pay me for something they can get for free? The truth is most people only know about ChatGPT; they have no idea what a custom gpt is. Also people are quite willing for something that makes their lives easier.

Method 2

Go to [Reddit](https://www.reddit.com), sign up. Type “home cooking” in the search bar. Then look at “communities” on the right-hand side.

Look for communities with a lot of members, let's use the first one as an example.

Create a post promoting your custom gpt, use the same ChatGPT messages as before. As with Facebook, the sky's the limit.

Method 3

Bundle a few custom GPTs together, for example look at the Productivity and Utilities category. Because you are selling a bundle of related gpts, your pricing can be much higher.

As before, create your listing in Gumroad, use chatgpt for the title and description etc. Promote on Facebook, Reddit.

I have not promoted on Etsy, but it could be an option as well.

Method 4

[Fiverr](#), is a place where you can list your services, products etc. Go to Fiverr and create a listing, here I would recommend you sell a pack of related GPTs.

Here's a video on how to get set up on Fiverr:

<https://www.youtube.com/watch?v=bZ41vDXf4d0>

As you can see, profiting from this massive pack of custom gpts is really easy.

Now it's up to you. You've got the custom gpts, places to promote them and a platform to sell from.

Go out there and promote your custom gpts and very soon you'll see the sales coming in.

Good Luck

Bonus Section

I recently found out that you can reverse engineer a gpt. Check out the video below to see how this is done.

<https://www.youtube.com/watch?v=en-8xtsP5R4>

So why would you want to reverse engineer a gpt?

Discover What Makes Profitable GPTs Work

By breaking down existing successful GPTs, you can see *exactly* which prompts, instructions, and user flows attract engagement and sales — giving you a **blueprint for building winners** every time.

Create Unique, Improved Versions That Stand Out

Reverse engineering helps you identify gaps or weaknesses in popular GPTs so you can add your own twist, features, or niche focus — making your version **more valuable and marketable**.

Build Unlimited Income Streams Without Starting from Scratch

Instead of reinventing the wheel, you can quickly clone proven concepts, customize them, and launch new GPTs fast — turning **existing success into your own repeatable profit system**.

Want to get even more custom GPTs, In fact 10 000+?
